

On Line Library Report 2023

Emily Rothstein, DVM, DACVD

Administrator/Librarian Web Site

The library was established initially in 2010 to bring journals to the members of the ACVD at a reasonable cost. After the first year, the library was available at no charge to diplomates and residents.

Dr. Dawn Logas and the website committee were instrumental in starting this. The Web Site committee and web master continue to work to allow access to the journals and texts. In 2014, we opened access to the ESVD who helps with the hosting fee, web master services and subscriptions.

In 2023, we received funding from Royal Canin exclusively for \$70,000.

The WebMaster was again busy with re-establishing some journal links.

Most viewed articles 2023:

Diagnosis and treatment of dermatophytosis in dogs and cats.

Guidelines for the diagnosis and antimicrobial therapy of canine superficial bacterial folliculitis (Antimicrobial Guidelines Work...

Treatment of the feline atopic syndrome –a systematic review
